

EURÓPSKY INŠTITÚT DALŠIEHO VZDELÁVANIA  
EUROPEAN INSTITUTE OF FURTHER EDUCATION

***Dear colleagues!***

***We invite you to submit  
to the scientific journal of EUROPEAN SCIENCE***

***European Science*** is a peer-reviewed international scientific publication established by **European Institute of Further Education** (Slovak Republic) **ISSN 2585-77387, EV 5691/18** (<https://european-science.sk/>).

The editorial board of the ***European Science*** journal is represented by renowned and distinguished scholars from the Slovak Republic, Lithuania, the USA, Ukraine, Germany, Malaysia, the Republic of Poland, Hungary, Georgia.

***European Science*** is an interdisciplinary scientific and applied journal addressing issues across law, economics, sociology, pedagogy, psychology and other subject areas. The scientific journal accepts **English-language** articles of academic style that contain the results of original research and have not been published previously elsewhere. The journal is published twice a year (an issue is edited up to 30.06 and 31.12). Special issues of the journal are published additionally.

***European Science*** is registered in 18 scientometric databases, which gives an opportunity to integrate into the world, European scientific space, and to exchange professional experience, opinions and views for our scientists.

You also have the opportunity **to give a good showing to your educational institution, faculty, institute, establishment, having advertised in the journal** that promotes an institution or establishment at the international level and allows to start cooperation with universities from other countries of the world.

*We uphold the principles of qualitative research practices, achievement and maintenance of balance between the interests of the authors, readers, editorial board, reviewing editors and institution where the research was conducted.*

#### **Recommended sections of a scientific article:**

1. **Abstract.** The abstract highlights main points of the article.
2. **Introduction.** A problem statement in general terms and its relation to important scientific or practical tasks; an objective statement (task setting).
3. **Literature review.** Actual scientific researches and issues analysis reveals the grounds for a solution to this problem the author has relied on and defines uninvestigated parts of general matters addressed in the article.
4. **Research methodology.**
5. **Research results.** A statement of basic research materials with full justification for the scientific findings.

6. **Discussion of research results.**
7. **Conclusions and directions for future research.**
8. **References.** A list of cited references.

## **FORMATTING YOUR ARTICLE**

The materials are accepted in electronic form (MS WORD).

The file name of the article should contain the **last name of the author**.

A **photograph of the author** should be sent separately with the size of 3x4 in JPEG format.

Text formatting: A-4 sheet size (210x297 mm), left margin is 30 mm, right - 15 mm, upper and lower - 25 mm, font size - 14pt, spacing - 1.5, font - Verdana.

The article should contain at least 0.5 printed sheets. (8-12 pages).

### ***The materials should be organized in the sequence:***

- ✓ full name of the author(s) (right-aligned independent section);
- ✓ academic rank, academic degree, position (right-aligned independent section);
- ✓ place of work: name of institution, place name (if not included in name of institution) (right-aligned independent section);
- ✓ country (right-aligned independent section);
- ✓ personal e-mail address (right-aligned separate section);
- ✓ ORCID iD (right-aligned independent section);
- ✓ title of the article (bold type, uppercase, separate flush paragraph, center alignment, single spacing);
- ✓ abstract (Word – 2003 Verdana 12pt, 1.5 spacing).

*The abstract highlights main points of the article. It should be written according to the following algorithm: the relevance of the topic chosen for research by the author is revealed in two-three sentences; the research objective and subject are specified; the methodology (method) of the research (its theoretical basis for a fundamental research) is revealed; the obtained results and its practical value are characterized. In so doing, each point should logically follow from the foregoing.*

*Quantitative results are preferable in the abstract of a research article; it is possible not to give results, but indicate the considered issues in a review. The abstract should not contain references. The abstract text should be concise and original. The abstract should not contain sentences from the body of the article, but it also should not include material that does not appear in the article. A volume is 600-700 characters.*

- ✓ keywords (5-10 words) (bold type, separate section);
- ✓ text of the article (Word – 2003 Verdana 14pt, 1,5 spacing);
- ✓ references are and formatted according to Harvard Referencing Style.

*The references are not numbered, but ordered alphabetically by author and chronologically when references are made to more than one work of the author (by year of a publication starting with the earliest). If there are works of one author published in the same year, they are placed in alphabetical order in the bibliographic list based on the titles of the works; in this case, the small Latin letter a, b, c... should be added to the year of publication.*

*A quotation is placed within quotation marks "...", the reference is added in parentheses, example: (Jones, 1967, p.27).*

### Formatting references:

A reference indicates all authors of the work, if authors are not available, then the editors are specified. If there are many authors, it can be written "et al." after a few names. Titles of books and journals are indicated without abbreviations. A title of the book, article, dissertation or author's abstract and a name of the invention should include its transliteration into English in square brackets. Example: Systematychna Teolohiia [Systematic Theology].

| <i>For example</i>                                     |  |

### Formatting figures:

An article should be **peer-reviewed** by a scholar of the research profile.

An article is accepted for publication when originality of the text has been determined and the article has been peer-reviewed by independent experts the author(s) is (are) informed about.

Articles are accepted for publication by an author and co-authors (a maximum of two co-authors).

The publication involves the author's funds:

**print version**                      **70 euro** (article up to 12 pages by an author);  
**100 euro** (article by co-authors).

(without providing a hard copy)  
**60 euro** (article up to 12 pages by an author);  
**80 euro** (article by co-authors).

The editorial board guarantees that one copy of the scientific journal is to be sent to the author of the article; the cost of an additional copy is 15 euros.

Please fill in the registration form to participate in the publication:

## European Institute of Further Education

invites you to benefit from other collaboration opportunities:

- **Publication of a monograph written by an author (or by co-authors)** (ISBN Slovakia, Serbia).
- **Publication of a monograph in the European Science journal** (*ISSN, the status is special issue of the journal, which amounts to a journal indexed in Scopus*).
- **Organization of international scientific** (conferences, seminars), **informational and educational** (round tables, meetings), **cultural** (exhibitions, presentations) **events**.
- **Certified examination in EU languages** (B2 and above).
- **International scientific and pedagogical internship**
- **Professional development for teachers**.
- **Professional development under the program of MBA** (*Master of Business Administration*), **LL.M.** (*Master of Laws*), **MSc.** (*Master of Science*).
- **Holiday and recreation schemes for the group of participants**

Sincerely,

**Jozef Zat'ko,**  
President of EIDV
